Re: Monthly Report for October, 2009

We recorded 10.8 inches of rainfall in October and used 479.2 million gallons of water for the month. Our average usage was 15.5 million gallons per day (mgd) or about 145.8 gallons per person per day (gpcd). Our daily water usage ranged from a minimum of 10.6 mgd (100 gpcd) on October 28 to a maximum of 20.3 mgd (192 gpcd) on October 1. For the year, we have recorded about 37.7 inches of rainfall. The October bacteriological and disinfectant by-product samples all tested negative for contamination. All of our chlorine samples tested within the normal limits for water quality.

During the month of October, we performed 76 free irrigation check-ups for residents. Since we began our free irrigation check-up program, we have completed over 3,400 check-ups. We also performed 169 meter checks for leaks requested by residents.

We inspected about 1,161 fire hydrants and about 140 manholes for proper operation. We repaired 14 sidewalks and installed about 139 traffic signs.

We used about 21,141 gallons of unleaded fuel and about 7,353 gallons of diesel fuel in the month of October.

We collected about 2,507 residential tons and about 2,730 tons of commercial solid waste. Curbside recycling was about 943 tons in September.
